Child Health Innovation

Thinking of **O**scar

We face an overwhelming wave of data in every industry

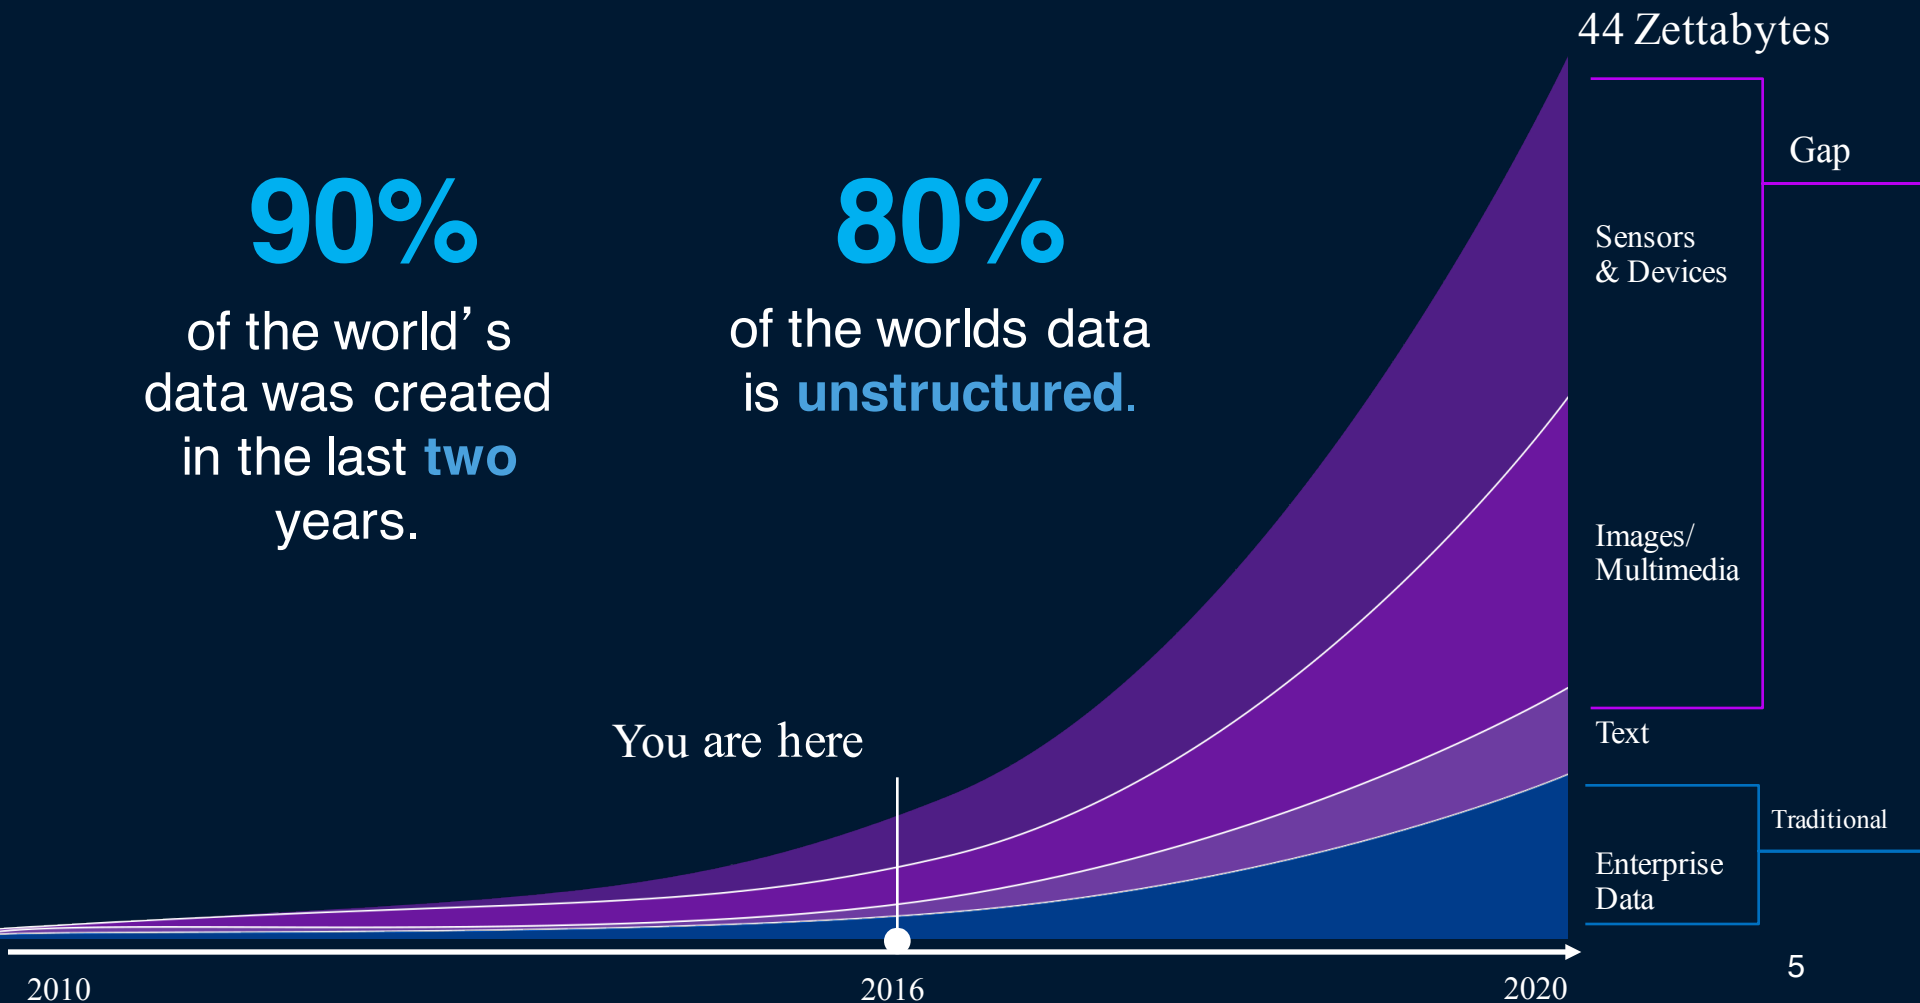

90%

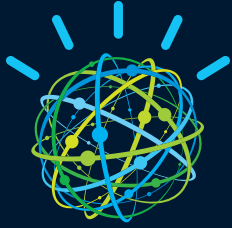

of the world's
data was created
in the last **two**
years.

80%

of the world's data
is **unstructured**.

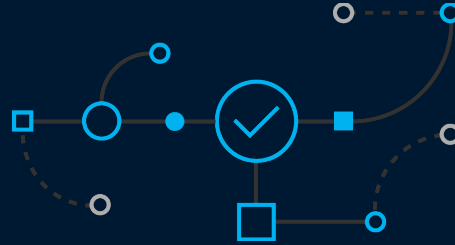

You are here

Understanding

Cognitive systems understand like humans do, whether that's through natural language or the written word; vocal or visual.

Reasoning

They can understand information but also the underlying ideas and concepts. This reasoning ability can become more advanced over time.

Learning

They never stop learning. As a technology, this means the system actually gets more valuable with time. They develop “expertise”.
