

August 18-20, 2025 | St Hilda's College, Oxford

Translating Promising Healthcare Innovations into Practice

Many innovations in healthcare have the potential to vastly improve health outcomes, make healthcare more efficient and contribute to the global knowledge economy. However, innovations may also have downsides including limited uptake, failures of scale-up or sustainability, increases in inequities, and unanticipated inefficiencies.

Building on the successful MSc in Translational Health Sciences at the University of Oxford, this Summer Academy takes an interdisciplinary approach to translating healthcare innovations into practice globally and will draw upon the expertise of:

Programme Director: **Professor Trisha Greenhalgh**
Course Director: **Dr Anne Ferrey**
Deputy Director: **Dr Rachna Begh**

University of Oxford Nuffield Department of
Primary Care Health Sciences

Event programme:

- Plenary lectures
- “Perspective Pairing” sessions
- Case-based workshops
- Networking events
- Poster sessions

The summer academy is designed for:

- Professionals
- Academics
- Industry leaders

and focuses on healthcare innovations such as:

- Biotechnology
- Artificial intelligence
- Medical devices
