Induction on Patient & Public Involvement for D Phil students

Lynne Maddocks, PPI coordinator

October 2018

Congratulations on getting a D Phil at Oxford!

"Dog obedience school insults my intelligence. What I'd like to do is go to a university and get a degree."

Patient & Public Involvement (PPI) is when you as researchers **actively work with lay people to help you in the full research cycle.**

The National Institute for Health Research says that “public involvement in research is an essential part of the process by which research is identified, prioritised, designed, conducted and disseminated.”

It is not about people who are subjects of your research – we call them participants.

It is not about any public engagement work you might do, where you give talks to the public or take part in a science festival etc.

Why do we involve PPI contributors?

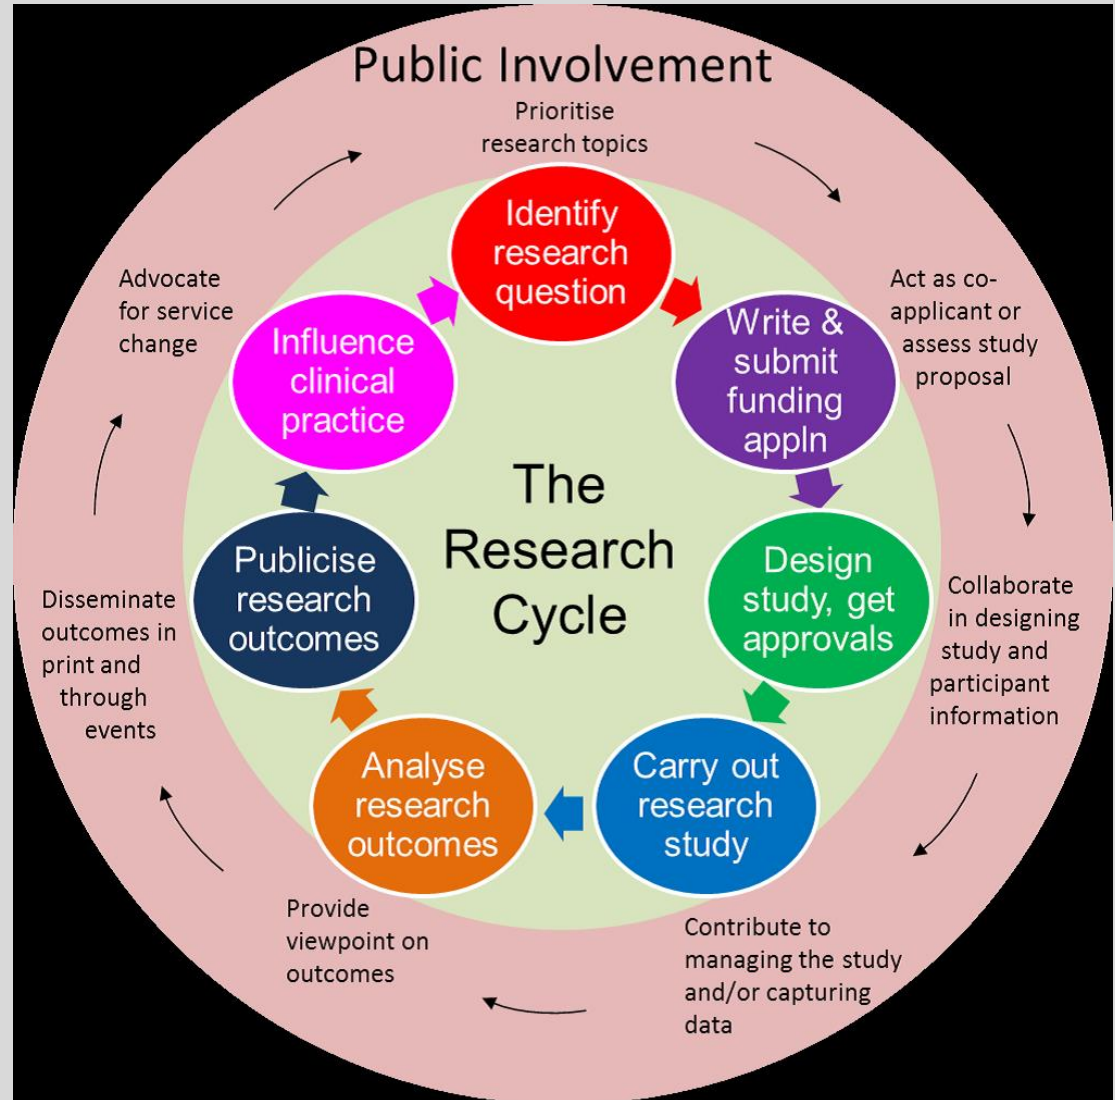

There are two fundamental reasons;

1. It is a public right to be involved because it is public money being spent. Either through taxes, or through charitable giving. It is also the public who will be affected by the research outcomes.
2. It will make our research better.

Here we tend to work on the principle that both of these reasons are equally valid.

What
does
good
PPI
look
like?

Today's main message!

There is a guide to help you in this work on the Department's web pages.

<https://www.phc.ox.ac.uk/get-involved/ppi/information-for-researchers>

Guide for researchers
working with Patient and
Public Involvement (PPI)
representatives

Get involved - make a difference
Like the writing through a stick of rock,
we place public involvement at the centre of our research.

Public involvement for researchers

Researchers guide to public involvement

A guide with all you might need to know about public involvement as a part of CLAHRC Oxford, no matter what stage your research is at.

From advertising and recruiting to inductions and finance.

[Download the researchers PPI Guide](#)

Welcome pack for public contributors

A welcome pack containing vital introductory material for you to pass on to the public contributors you are, or are planning to, work with.

This pack will tell them all they need to know about working with you and CLAHRC Oxford.

[Download the welcome pack](#)

WHAT IS PUBLIC INVOLVEMENT?

Public Involvement – also called ‘Patient and Public Involvement’ or ‘PPI’ – is, as its name suggests, involving the public in your research.

Public Involvement in health and social care is research being carried out **with** or **by** members of the public, rather than **to**, **about** or **for** them.

This includes, for example, working with research funders to prioritise research, offering advice or expertise as members of a project steering group, commenting on and developing research materials, undertaking interviews with research participants.

This is how INVOLVE – a national advisory group on public involvement funded by the NIHR – define it, and is the definition we use.

The CLAHRC PPI payment policy

The CLAHRC Oxford Policy on reimbursement of expenses and involvement payments (e.g. timelines, travel, office supplies, meals and accommodation, etc)

Also includes a link to a cost-calculator to help with budgeting for public involvement.

[Download the PPI Payment policy \(.doc\)](#)

Other public involvement and engagement resources

Toolkits, social media tips, evaluating the impact of involvement, engaging with patients, co-production, shared decision making and so on.

If you have a question not answered elsewhere, you'll likely find a help here.

CLAHRC OXFORD AND PUBLIC INVOLVEMENT

CLAHRC Oxford, as part of the NIHR, is committed to involving patients and the public in the work it funds or supports.

To this end we have a dedicated ‘Patient and Public Involvement Co-ordinator’, **Lynne Maddocks**, who you can contact with questions or for other help with public involvement.

E-mail: ppi@shc.ox.ac.uk
Tel: (01865) 617198

PPI case studies

A collection of short public involvement case-studies based on real world examples of involving the public in research, and the difference this can make to a project.

PPI Q&A

An informal, open, drop-in session for all health and medical research staff working in Oxford – come and ask your questions and get advice about involving patients and the public in your research projects.

No need to stay for the full time – you can simply get your answers and go when you're done.

And there are no 'stupid' questions!

Working Together: Training and Development Programme | 2018

For healthcare professionals, researchers,
patients, carers and the public

28
February

Working Together: approaches and techniques

For people with some experience of PPI

Didcot Civil Hall, 12pm-5pm

30
April

Working Together: approaches and techniques

For people with some experience of PPI

The Gateway Aylesbury, 12pm-5pm

05
June

Writing for lay audiences

For people with some experience of PPI

Oxford Academic Health Science Network, 10am-12.30pm

11
September

Lay partners on staff interview panels

For people with some experience of PPI

The University of Reading, 10am-1pm

06
November

Working Together: an introduction

For people new to patient and public involvement

Unipart Oxford, 10am-12.30pm

For more information or if you are
interested in taking part:

email: ppi@phc.ox.ac.uk
web: bit.ly/workingtogetherprogramme

Sponsored by:

- NIHR Clinical Research Network (CRN) Thames Valley and Midlands
- NIHR Oxford Biomedical Research Centre
- NIHR Oxford Health Biomedical Research Centre
- NIHR Collaboration for Leadership in Health Research and Care (CLAHRC) Oxford
- Oxford University Hospitals NHS Foundation Trust
- Oxford Health NHS Foundation Trust
- Oxford Academic Health Science Network (Oxford AHSN)
- Oxford Institute of Nursing, Midwifery and Allied Health Research (OxNIAMHR)

Virtual Pool

130+ PPI Contributors

- Over 80 of them live in the Thames Valley
- Over 8 of them are under 30 years old
- Over 40 of them are newly recruited and have no PPI experience
- Have conditions ranging from diabetes to cancer, from COPD to mental health problems.
- Have life and work skills ranging from editing to IT, to project management and engineering.

There are also many resources that are available to you.
