Main teaching achievements

The HERG programme of qualitative methods courses continues to attract doctoral students and health professionals. In 2018 we ran the following courses:

Introduction to Focus Groups (1 day: CA)

Introduction to Qualitative Interviews (n3) (1 day: JH, AMB, CA, SR)

Analysing Qualitative Interviews (n3) (2 days: JH, MG, LH, CA, AMB, VW, SR, OVH)

Qualitative Research Methods (5 days: JH, MG, LH, CA, SP, RS, AMc, FD, JH, JC)

In November 2018 CA took over from JH as Teaching Lead.

In total 174 students attended the courses and feedback is consistently excellent as the following extracts illustrate:

I feel more confident and inspired to do qualitative data analysis. I really liked the encouraging approach.

Gave me confidence in doing quals and different methods of approaching it. Nice balance of practical and applied group, small group and sole practicals.

Demystifying qual research. Practical, clear and comprehensive.

This has been the most enjoyable course / conference I have ever done. Although this is partly because I was interested in area – the clarity, structure, notes, examples, practical sessions were brilliant. I came away inspired and happy which in the current work climate where I work, is a feat!

Undergraduate teaching. Oxford University NVivo courses, twice termly throughout 2018 (CA)
Graduate entry medicine (CA, SZ)
