Are you an employer looking for new ways to develop the next generation of Research Delivery Leads?
Could you help to mentor colleagues to develop the research delivery leaders of the future?

Introducing the **NIHR-AoMRC Clinician Researcher Credentials Framework**, created to provide the necessary networks, skills and confidence needed for healthcare practitioners from any regulated profession to lead and support clinical research delivery.

Join us on **Wednesday 22 March 2023** from **12.30 to 2.00pm** to learn more about the Framework and how it can help you to develop the Research Delivery workforce.

What is the NIHR-AoMRC Clinician Researcher Credentials Framework?

The Framework consists of **Master's level qualifications** and is designed for learners with **busy work schedules** studying **part time**.

Flexible access is provided to theoretical **online modules** that develop learners' knowledge and insight of the approaches to, and delivery of, clinical research.

Learners put their learning into practice by undertaking a **workplace-based module** where they work on existing research projects in their local area, supported by the mentorship of an experienced researcher.

Who can attend?

Employers, if you are looking for new ways to develop the next generation of research delivery leads, this event is for you.

Potential workplace supervisors, if you are experienced in research delivery and want to help to develop the research delivery leaders of the future, this event will explain what the supervisor role involves and what you can gain from it.

Full details about the NIHR-AoMRC Clinician Researchers Credentials Framework can be found on its website:
